# Mission

Every patient today  
deserves the best medicine  
tomorrow can deliver.

---

A major partner of Hôpital Maisonneuve-Rosemont (HMR), the HMR Foundation has supported the hospital's development strategies since 1978, seeking to better meet patient needs.

Deeply committed to making a difference, the Foundation supports projects focusing on the ongoing improvement of patient care, the development of teaching and the expansion of research. The Foundation solicits the financial support of individuals, private foundations, partners and businesses. Together, they recognize the excellence of the care provided to patients at HMR, an outstanding medical centre affiliated with Université de Montréal.

# Healing stems from all of us

Welcome to our new world! We are proud to unveil our new visual identity, and we're sure you'll love it too. The result of a thorough examination of our positioning as a Montreal-based hospital foundation, our new brand identity stems from one of Hôpital Maisonneuve-Rosemont's unique strengths: renewed health through cellular therapy.

A veritable revolution in the treatment of incurable cancers and other diseases, such as heart failure and autoimmune disease, cellular therapy and regenerative medicine bring patients new hope. HMR has developed nationally and internationally renowned expertise and has some of the world's most advanced infrastructures for producing "cell-based medications" for clinical applications. These new treatment options are more effective and result in fewer side effects than traditional treatments. Another well-kept secret: HMR is a global leader when it comes to R&D in this cutting-edge field.

And because every patient deserves the best of tomorrow's medicine today, the Foundation wishes to continue supporting HMR in this promising area. Since 2011, the Foundation has distributed over \$9M to HMR to support the development of these remarkable medical advances, namely through the Centre of Excellence in Cellular Therapy, Canada's largest and one of the world's largest such facility.

By continuing its daily work for patient care, research and teaching, the Foundation has helped HMR turn major projects into reality for the benefit of patients and researchers, including by creating a university ophthalmology centre at Université de Montréal in March and opening a cancer immunotherapy commercialization centre in July. In the following pages you will discover some of the Foundation's other accomplishments made possible by the generosity of our donors and partners.

Inspired by the great promise of cellular therapy, let us stand together with our fellow Montrealers and future generations and support the treatments of the future, which are just around the corner.

Together, healing HMR's patients stems from us!

**Lucie Drapeau**  
Executive Director

**Jean Laurin**  
Chair of the Board

# A new image to better express our mission

## Our new logo

Colourful and dynamic, the HMR Foundation's new identity platform features moving cells forming a chain to illustrate our ability to join forces to regenerate health through sharing, solidarity and selflessness.

The main logo, illustrated using a single green cell, represents a stem cell from which this chain reaction of support for patients is born. The vivid colours of the platform evoke energy, concrete action for the Foundation and its life-affirming, welcoming and positive impact on the community. Also, the multitude of cells reminds us that for HMR's patients, healing stems from every one of your acts of generosity toward the Foundation.

## Our signature

Healing stems from you when you reach out to patients and their loved ones and give them hope and relief.

It's about supporting the Foundation and the best in research, patient care and teaching at HMR. It's about giving hope, one cell at a time, one act at a time.

## Chain of solidarity

*"I am delighted to know that we can count on HMR Foundation spokespersons Lulu Hughes and Mai Duong. All three of us are united by the challenges we've faced and are so grateful to be alive. We wish to express our gratitude for the outstanding care we received at HMR and call on your generosity on behalf of all the patients confronted with a cancer diagnosis."*

**Become a link in  
our chain of solidarity.**

---

**Dominique Michel**

Volunteer spokesperson for the future Integrated Cancer Centre, with Lulu Hughes and Mai Duong, all of whom survived cancer thanks to HMR.

# Financial statements

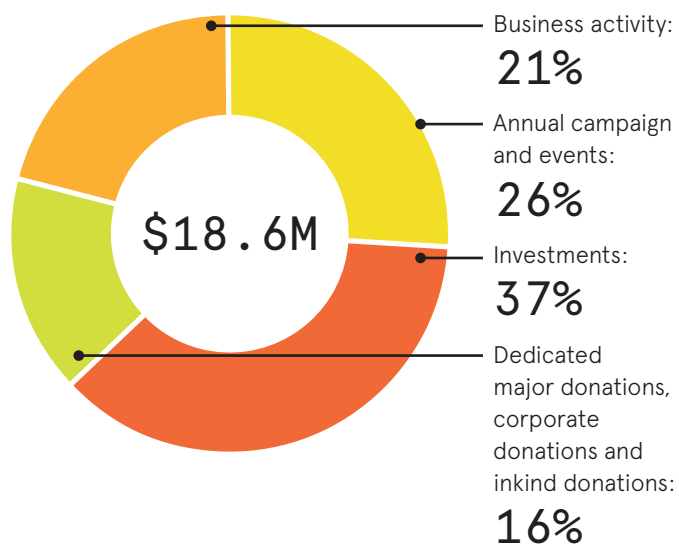

Since 2008, the HMR Foundation has handed over \$67M to HMR to support its three-part mission. In 2016, the Foundation was proud to have given HMR: \$6.3M for healthcare and equipment, \$3.3M to support research and Chairs, and \$400K for skill development and teaching.

For the sixth year in a row, the HMR Foundation has ranked among the top 100 largest and best managed organizations where the highest percentage of funds go directly to helping beneficiaries (Source: MoneySense Magazine). It even ranks among Canada's top five hospital foundations.

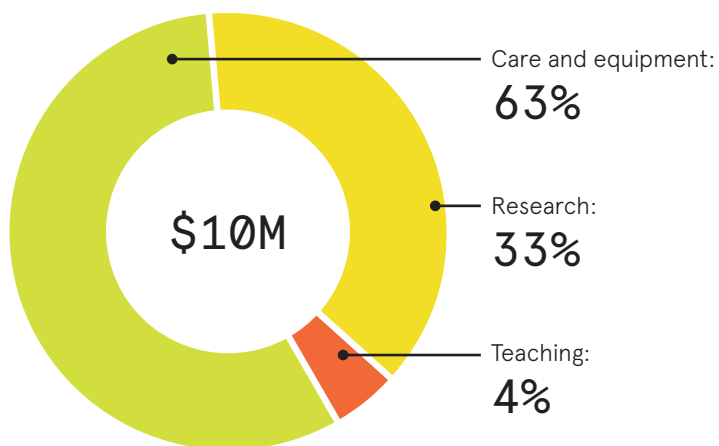

This sound management is expressed through continually rising revenues, effective fundraising events, dedicated resources and engaged volunteers and Board members.

Thank you all for your unwavering support.

# Healing stems from you... and your generosity

The Hôpital Maisonneuve-Rosemont Foundation plays an essential role in supporting our three-part patient care, teaching and research mission.

Many projects aimed at humanizing care and innovating would never have been possible without the Foundation's invaluable support.

This has been the case for the HMR Centre of Excellence in Cellular Therapy, one of the world's leading cellular therapy and regenerative medicine centres. Thanks to stem cells, researchers and clinicians now have at their disposal a range of innovative approaches with amazing potential to fight cancer. In this respect, the HMR Foundation is where healing begins.

But it is also where generosity begins: providing the public and the business community with the ability to contribute to a charitable organization that fosters the health of each and every one of our fellow citizens. I am therefore pleased to take advantage of this Hôpital Maisonneuve-Rosemont Foundation Annual Report to highlight the essential character of the Foundation's contribution and express my deep gratitude.

**Yvan Gendron**  
President & CEO  
CIUSSS de l'Est-de l'Île-de-Montréal

5,003 employees

483 doctors

124 researchers

611 resident physicians

485 volunteers

1,649 nurses

1,246 interns

20,089 surgeries

79,915 visits to the ER

617 beds

2,813 births

668,000  
people served, representing  
1/3 of Montreal's population

## Fields of excellence

### Ophthalmology

Home to Quebec's largest group of ophthalmologists, the vision health department, officially referred to as Université de Montréal's university ophthalmology centre, has some of North America's most well equipped labs and **world-renowned expertise**.

### Immunology-oncology

This field seeks to better understand the mechanisms that regulate genomic instability, the development of cancers, immune reconstitution and the T-cell response. HMR's high level of excellence has led to **Quebec's greatest concentration of expertise in blood cancer treatments, namely in stem cell transplantation**.

### Nephrology

**The HMR hosts the largest single-site dialysis centre in Quebec.** HMR's nephrology professionals are renowned for their many research projects aimed at finding treatments that could cure kidney failure and related illnesses, including diabetes and high blood pressure.

## A discipline that sets us apart

### Cellular therapy

A veritable revolution in the treatment of incurable cancers and other diseases, such as heart failure and autoimmune disease, cellular therapy, regenerative medicine and immunotherapy bring patients new hope. They unleash the power of immune system cells in order to detect and eradicate cancer cells. These "cellular medications" are more effective and produce fewer side effects than traditional treatments. Few medical centres are as well equipped to deliver such cellular medications to patients. **In Canada, HMR has the largest and most advanced infrastructure to produce them for clinical use.**

## Accomplishments

Thanks to the invaluable support of our donors, many projects became a reality in 2016. In this section, you will be able to read about the accomplishments, big and small, that have improved patient care at HMR.

# Impact of your donations in 2016

for patient care in 2016

## ORTHOPEDICS

# First in Canada: complete hip replacement surgery in one day

\$312,790

On August 4, 2016, Dr. Pascal-André Vendittoli and his team accomplished quite a feat, performing a complete hip replacement in one day.

Until very recently, this complex surgical procedure meant a five-to-six-day hospital stay. This medical breakthrough brings tangible benefits to patients: better pain management, less nausea, tight closure of the wound and preservation of muscular strength. Given the limited side effects of the procedure, patients return home after only a few hours. The medical team estimates that, in the medium term, around 70% of patients will be able to benefit from this medical advance. The Foundation is proud to have contributed \$312,790 to this Canadian first.

*"I was the first patient to have agreed to take part in this new protocol at HMR and I'm very proud of that. And by doing so, I got to benefit from outstanding care. Only two hours after the surgery, I was able to walk, and I even managed to go up a few stairs that day. And the same day I was operated on, I was able to return to my home in Terrebonne. I didn't have any side effects like bleeding or nausea and I was just as independent as I was before the operation.*

**I am thrilled with the services I received from Dr. Vendittoli's talented team at HMR. Thank you!"**

**François Marien**  
Patient

## RADIATION ONCOLOGY

Croire fund: for patients' physical and psychological wellbeing

**\$42,228**

Above and beyond the side effects caused by treatments, cancer is a disease that completely disrupts the quality of life of patients and their loved ones. The goal of the Croire fund is to support these people psychologically and socially. It provides essential emotional assistance along with approaches that complement medical treatment, including yoga, nutrition, meditation, art therapy and massage

therapy workshops. A total of 55 workshops were organized this year for the benefit of 1,353 participants.

## ONCOLOGY

Electronic ticketing:  
putting an end to the wait

**\$19,500**

In the past few years, the HMR Oncology Centre has seen patient numbers jump 20%. Every day, between 20 and 40 patients had to wait, standing up, for up to 45 minutes before and after their medical visit. That was a very long wait, especially for sick and frail patients. To fix the situation, the HMR Foundation provided \$19,500 to purchase an electronic ticketing system that provided a real-time view of patient waiting time. This made it possible for patient care staff to be assigned continuously throughout the day

as needs changed. The benefits are clear: an increase in the number of patients treated, a calm setting where patients await their visit in comfort, and the total elimination of the waiting line.

## NEONATAL UNIT

Level IIIA: caring for babies born  
at as few as 26 weeks of gestation

**\$152,867**

The Foundation made it possible for HMR to acquire specialized equipment and vital supplies so that the hospital's neonatal unit could be level IIIA-certified, qualifying it to welcome babies born prematurely after as few as 26 weeks of gestation. The donation allowed for the purchase of an amplitude-integrated EEG machine that indicates whether controlled hypothermia treatment can be started in order to slow the progression of injuries to the baby's brain, prevent lasting adverse effects and reduce the risk of death. Furthermore, the neonatal unit was also able

to acquire air-oxygen mixers to resuscitate newborns, a lamp and neonatal radiant canopy warmer on stable wheels to prevent hypothermia, as well as transport mattresses to properly secure newborns during interhospital transfers.

## MEDICAL BIOLOGY

Technology: lowering  
the risk of error

**\$101,000**

In the coming years, HMR's medical biology labs will see a 40% to 100% increase in demand depending on the area of activity. To meet that demand and improve the labs' performance, they have purchased a next-generation sequencing platform thanks to the HMR Foundation. The platform has an ultra-advanced computerized analytical capacity that makes it possible to establish fast, effective and more complete diagnoses at a lower cost, yielding estimated savings of \$75,000 a year. This technology has

a notable impact on the quality of analyses conducted by reducing the risk of error and, subsequently, complications for patients.

## NUCLEAR MEDICINE

Purchase of a Xeleris console:  
efficiency gain

**\$26,264**

In nuclear medicine, it's important that all doctors have a Xeleris console at their disposal to interpret the tests that have been performed, such as PET/CT scans, which are used to detect cancer early and follow its progression, evaluate the effectiveness of a treatment and detect the first signs of Alzheimer's disease. Given that a physician had recently joined HMR's nuclear medicine team and in light of the volume of test requests, the department needed to acquire

an additional console to avoid the loss of efficiency created by the need to share consoles. In 2016, the console provided by the Foundation led to an efficiency gain that benefited patients, because the sooner a diagnosis is made, the sooner treatments can begin!

## PEDIATRICS

Biofeedback project: treating  
urinary incontinence in children

**\$17,200**

When children are finally able to control their urination, it's a big step toward independence. A chronic incontinence problem can be a major burden and source of distress for the child. Bladder re-education treatment using biofeedback can yield a significant improvement in chronic symptoms. The treatment helps diminish psychological harm to the child as well as the repercussions on his or her family, much to the relief of all concerned. On April 6, 2016, for the fifth year in a row, Opération Enfant Soleil renewed its support for the HMR Foundation by donating \$16,073

for biofeedback treatment of incontinence in HMR's young patients. The Foundation supplemented that amount with \$1,127 to meet the remainder of the project's financial need.

## Research stems from your generosity

At the HMR Foundation, your donations lead to discoveries, medical advances, breakthroughs, new treatments and solutions, because we believe that research is the key to tomorrow's medicine and our gift to future generations.

---

**\$3.3M**

for research in 2016

## CELLULAR THERAPY

# Centre for Commercialization of Cancer Immunotherapy (C3i)

\$500,000

In 2016, one more step was taken in the fight against cancer: Innovation, Science and Economic Development Canada and the Networks of Centres of Excellence of Canada granted \$15M to HMR to establish the Centre for Commercialization of Cancer Immunotherapy (C3i).

The Centre will make it possible to develop innovative, non-toxic treatments using immunotherapy to fight cancer. These revolutionary treatments harness the power of the immune system to cure patients, improving their quality

of life and reducing the cost of care. By 2025, these treatments could be used in 60% of patients with advanced cancers. The medicine of tomorrow is being developed right here, right now, at HMR!

In 2016, the \$500,000 provided by the HMR Foundation enabled the hospital to obtain \$15M in subsidies from the Government of Canada and \$2.5M from the Government of Quebec, while providing the financial leverage to attract a further \$35M in contributions from over 40 industry and university partners. In all, \$50M was invested to make this major project possible and to make advances in personalized medicine.

C3i's activities will be conducted at HMR's Research Centre and the Centre of Excellence in Cellular Therapy (CETC), whose creation in 2013 was made possible by nearly \$9M in support from the HMR Foundation.

## CELLULAR THERAPY

Support for the development of Regenerative Medicine and Cellular Therapy Network (CellCAN)

**\$400,000**

In 2013, with the support of the HMR Foundation, HMR created Quebec's first Centre of Excellence in Cellular Therapy and Regenerative Medicine. In so doing, the hospital and its medical teams consolidated their leadership position in Canada in the field of cellular therapy, a medical discipline that has been practiced at HMR since 1980. In 2014, to promote the advancement of research and facilitate the development of stem cell treatments, they created CellCAN, a network that brings together stakeholders from the field to share knowledge and best practices. CellCAN is led by Dr. Denis Claude Roy, Scientific Director at the HMR Research Centre. In 2016, the HMR Foundation provided CellCAN with \$400,000 to support advancements in cellular therapy and the development of personalized stem cell treatments.

---

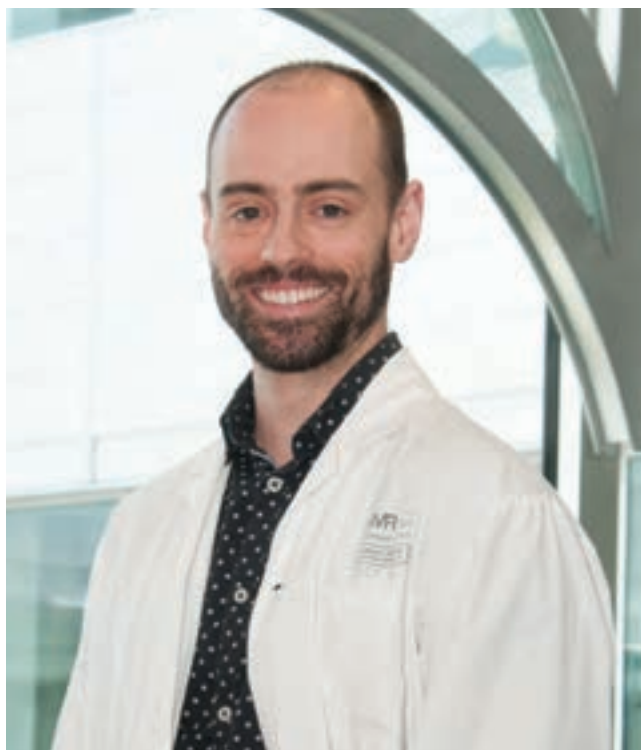

## ONCOLOGY

Breast cancer: helping women affected by "chemo brain"

**\$370,000**

Thanks to contributions of \$350,000 from the Quebec Breast Cancer Foundation and \$20,000 from the HMR Foundation, a promising pilot project was launched at HMR to help women with breast cancer who suffer cognitive difficulties linked to chemotherapy, a condition known as "chemo brain." The project's goal is to screen for, evaluate and treat the cognitive difficulties linked to cancer treatments, including stress, low self-esteem, depression, anxiety and fatigue. Using a multidimensional approach, the team at HMR seeks to improve the experience of cancer patients and their loved ones, all of whom suffer from the disease's consequences, in order to lessen the repercussions of the treatment.

## ONCOLOGY

Research project  
on pediatric leukemia

**\$100,000**

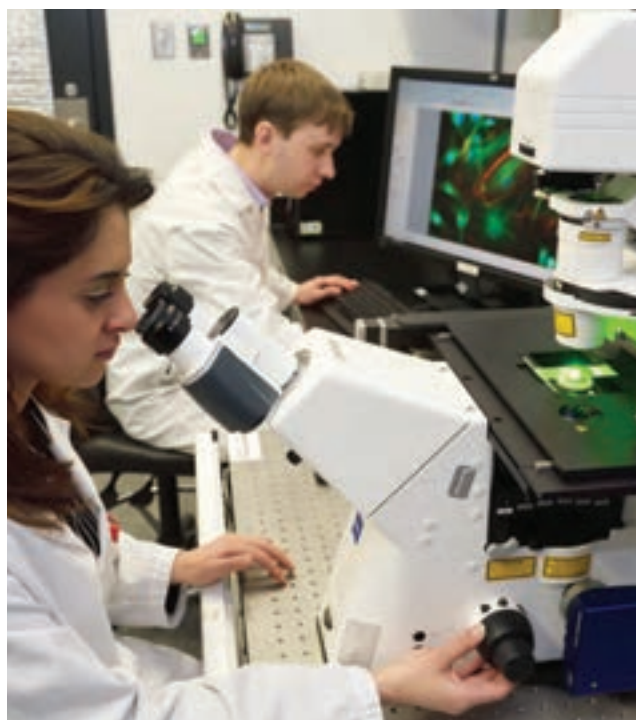

Thanks to a generous donation from the Cole Foundation, we were able to provide Dr. Frédérick Mallette with \$100,000 for his research on pediatric leukemia, Canada's most pervasive cancer. His research project deals specifically with acute megacaryoblastic leukemia, which accounts for around 10% of blood cancer cases. This type of leukemia is characterized by genetic anomalies called "oncogenic fusions" which alter normal cellular functions and contribute to the onset of the disease. Unfortunately, the disease's prognosis is dire: less than 20% of young patients survive more than two years after being diagnosed. Dr. Mallette and his team use cutting-edge molecular and cellular biology techniques, as well as biochemistry techniques, to uncover the causes of this type of leukemia. The ultimate goal is to identify therapeutic approaches to treat this fatal disease affecting children.

## RESEARCH CENTRE

Purchase of equipment  
to make innovative discoveries

**\$951,000**

To respond to growth in activities, consolidate achievements, provide development support and enable researchers to make innovative discoveries, the HMR Research Centre depends on the HMR Foundation's essential support. In 2016, the Foundation contributed \$951,000 toward the acquisition of new equipment and replacement of old equipment. Thanks to this contribution, the HMR Research Centre was able to purchase an autoclave for sterilizing equipment using high-pressure steam, which is an essential best practice for laboratories; an agitator plate for one of the cell culture rooms; freezers and refrigerators to store human samples; oxygen-level detectors; and a Bioplex system for peptide/protein analyses, used primarily by researchers focusing on immunology and oncology.

## Knowledge stems from you

At the HMR Foundation, your donations train more doctors and help the medical staff develop. Remaining on the cusp of knowledge and technology enables them to deliver the best possible patient care day after day.

---

**\$400,000**  
for teaching in 2016

## OPHTHALMOLOGY

# A prestigious venue for the ophthalmology department

**\$12M**  
in 10 years

On March 14, 2016, the Foundation proudly accepted the honour of having the Hôpital Maisonneuve-Rosemont Ophthalmology Department designated as the Centre universitaire d'ophtalmologie de l'Université de Montréal (CUO).

Over the last decade, the Foundation contributed over \$12M to the development of the field of vision health, all for the benefit of patients. This designation is the crowning achievement that recognizes the excellent work of HMR's teams. As the population ages, the incidence of blindness and poor vision is growing exponentially. Delivering state-of-the-art care is a public health priority that will help people stay active and maintain their independence. This designation ushers in a new era of cooperation that will result in a greater synergy between the patient-care, education and research activities of all the ophthalmology teachers at Université de Montréal. More than ever, these professionals will share their expertise and keep in step with discoveries and emerging therapies on the global stage.

## ORTHOPEDICS

A prestigious venue for the  
ophthalmology department

**\$10,000**

On January 7, 2016, HMR was given its first virtual reality open surgery training simulator (knee reconstruction via total arthroplasty). The simulator was developed by OSSimTech in partnership with three orthopedic surgeons: Dr. Marc Isler and Dr. Vincent Massé from HMR and Dr. Véronique Godbout from CHUM. The simulator allows residents to build their confidence, develop dexterity by enabling them to drill and saw bones with an eye to minimizing patient risks, while reducing the stress associated with learning their discipline. The SIM-KTM simulator is a fantastic training tool for the medical education community, and the Foundation is proud to have contributed \$10,000 to help create it.

## TEACHING UNIT

Supporting tomorrow's  
medical professionals

**\$78,000**

In 2016, the Foundation made it possible to upgrade some frequently used teaching rooms. The clinical teaching unit for internal medicine, located on the 9<sup>th</sup> floor care unit, was completely redesigned as a highly functional environment for learning and collaboration, with high-powered computers, an HD display, up-to-date reference books and more. This is where resident physicians and externs treat patients under the supervision and tutelage of an internist. The room is also used as a venue for interprofessional meetings.

## ONCOLOGY

Learning kits: better understanding treatments

**\$20,000**

For the past six years, the HMR Oncology Centre has developed classes designed to allow a constantly growing number of patients to benefit from information before their chemotherapy or radiation therapy treatments begin or before they undergo a hematopoietic stem cell transplant. These information sessions benefit over 750 patients a year. They contribute to patients' quality of life by teaching them about the signs and symptoms to watch out for at home

and how to react to them, and when to contact the care team to limit the severity of the situation. The classes help reduce anxiety in patients.

## EAR, NOSE & THROAT

A better way to learn surgical sequences

**\$15,325**

Endonasal septoplasty and rhinoplasty are two operations performed in otorhinolaryngology, often called "Ear, Nose & Throat" (ENT). They need to be mastered by residents at the end of their residency at HMR. Until early 2016, this subject matter was very difficult to teach, as the teaching surgeon was unable to watch the operation as it was being carried out inside the patient's nose. To address this shortcoming, teacher and resident had to trade places constantly. But since a flexible high-definition ENF-VH scope was acquired through a donation from the HMR Foundation, the surgeons' ability to teach has improved. Installed on a nasal spreader, it transmits the various steps

of the operation onto a projection screen in real time. Residents now have a better understanding of the steps the teaching surgeon has to perform at every step of the operation, which increases their sense of security and their confidence when they have to apply the steps themselves. Furthermore, rather than analyzing the resident's work once the steps have been performed, the teaching surgeon can provide feedback immediately.

## GRANTS AND ADVANCED TRAINING

**\$337,911**

Every year, the HMR provides care staff with encouragement. In 2016, in addition to enabling 329 people to receive advanced training or attend professional development workshops worth a total of \$177,577, the Foundation awarded eight research grants to up-and-coming professionals, as well as eight fellowships for members of the *Conseil des médecins, dentistes et pharmaciens*, totalling \$160,334.

### **Congratulations to the recipients of this year's HMR Foundation research grants!**

Alexandra Beaudry-Richard; Étienne Bénard-Séguin; Achraf Boutayeb\*; Dr Tanguy Boutin; Amina Dahmani; Rimi Hamam; Dre Caroline Lamarche\*; Charles-Étienne Lebert-Ghali; Dr Jonathan Lévesque; Dr Joannie Lefebvre; Dre Katherine Marchut; Dre Kinda Najem; Lucas Perus; Dr Jean-Sébastien Trépanier

\*Two grants received in 2016

## Enjoyment stems from us too

“Because I’m fortunate enough to be healthy, I feel honoured to be able to contribute to the HMR Foundation’s efforts to help those who aren’t so lucky.

*Fundraising events and campaigns are the perfect opportunity to show my support for the Foundation’s work. I regularly attend and very much enjoy the Montréal Passion Vin benefit event, especially given that the revenues it generates go directly to improving patient care and quality of life. This is an objective that really speaks to me, because as an architect, I am also committed to improving quality of life for users and communities through well-designed spaces with a view to sustainable development.”*

# Impact Néphro

## \$440,000

**March 12, 2016**

At the 9<sup>th</sup> edition of this benefit event, 322 guests and 22 generous partners teamed up with the HMR Foundation

to raise **\$440,000** in net proceeds. The funds raised at the event, which was held in the Olympic Stadium's tourist hall, have been earmarked entirely for improvements in care and for **kidney disease research**, one of HMR's fields of excellence. To date, the event has raised over \$3M for the cause. Thank you!

Members of the Organizing Committee, with key benefit event actors. Left to right: Yvan Gendron, Francis Perreault, David Nguyen, Michel Martin, Dr. Vincent Pichette, Dr. Louis-Philippe Laurin, Lucie Drapeau, Dr. Annie-Claire Nadeau-Fredette and Dr. Gabriel Chan.

# Golf Tournament

## \$265,500

**September 21, 2016**

Around 180 golfers took to the greens at the prestigious Laval-sur-le-Lac Golf Club for the 21<sup>st</sup> edition of the HMR

Foundation Golf Tournament. Dedicated to the memory of Normand Beauchamp, one of the pillars of French-language radio in Quebec, the benefit event netted **\$265,500** for the future HMR **Integrated Cancer Centre**. During the event, the Beauchamp family announced a major donation of \$30,000 in memory of their father. A heartfelt thanks to the Beauchamp family and everyone who attended.

Left to right: Benoit Desjardins, Jean Laurin, Sylvain Beauchamp, Daniel Beauchamp, Luc Beauchamp, Danielle L. Caron, Lucie Drapeau, Xavier Luydin, Marc Verreault, Yvan Gendron, Dr. Guy Leblanc and Dr. Robert Filion. Thank you, everyone, for your invaluable support!

Louise Sanscartier, Organizing Committee Chair, with all the Committee members and the event spokespersons and emcee.

# À Votre Santé! \$232,355

**November 3, 2016**

The 5<sup>th</sup> edition of the À Votre Santé! event, emceed by Virginie Coossa, brought together 445 guests at Agora Hydro-Québec, kick-starting the big weekend of Montréal Passion Vin festivities. Accompanied by Lulu Hughes, Mai Duong and many other celebrity friends, our volunteer spokesperson, Dominique Michel, highlighted her five years of remission and five years of commitment to the HMR Foundation. A magical evening!

# VO À SANTÉ

BMO  Wealth Management  
BMO Private Banking

Major Donor Partner

Announcement of the proceeds from the weekend of *Montréal Passion Vin* festivities, with Société des alcools du Québec President & CEO Alain Brunet, HMR Executive Director Lucie Drapeau, Manulife Financial (Quebec) President & CEO Richard Payette, along with Montréal Passion Vin 2016 co-chairs Martin Gauthier, President & Senior Partner at Sid Lee Montreal, and Mathieu Duguay, President of COGIR Real Estate.

## Montréal Passion Vin \$1,544,010

**November 4 & 5, 2016**

Attended by over 600 guests, the 15<sup>th</sup> edition of *Montréal Passion Vin* came to a brilliant close. Thanks to the hard work of the Organizing Committee, co-chaired by Mathieu Duguay and Martin Gauthier, the Foundation raised a record **\$1,544,010** in net proceeds, which included revenues from the À Votre Santé! event. This superb 2016 vintage of the event brought the total funds raised to date by the HMR Foundation for the future **Integrated Cancer Centre** to \$9.9M of its \$12M goal.

enjoyed for  
the cause

## A big thank-you to the SAQ

for 15 years of outstanding collaboration,  
resource sharing and know-how. Like a great  
wine, our partnership ages well.

## Where commitment stems from

*"Our son Jean-François was diagnosed with leukemia on July 22, 1991, at the age of three. Despite three years of treatments, chemotherapy and radiation therapy, he passed away on May 27, 1994. That was the very moment we decided to help sick children at Hôpital Maisonneuve-Rosemont and improve their quality of life.*

*We wish to thank our family and friends from the bottom of our hearts. They have supported us for over 20 years and helped our benefit events raise nearly \$800,000. In 2016, your generosity made it possible to move and renovate the pediatric medicine day centre. As a result, the centre is now able to welcome more patients, prevent hospitalization, care for younger and older children in two separate environments each better suited to their respective needs, and provide a safer setting for our clients and care staff."*

---

A black and white portrait of an older man with a white beard and mustache, wearing a dark suit jacket over a light-colored checkered shirt. He is smiling slightly and looking towards the camera. The background is a bright, out-of-focus indoor setting.

## Healing stems from your generosity

*"At age of 49, I started suffering from pain in my right shoulder. At first, the doctors treated me for arthritis, but to no avail. That's when I was diagnosed: multiple myeloma, a rare form of bone marrow cancer. They gave me six to 12 months to live. I was in shock. I searched the Web and consulted doctors in Switzerland and Italy to find the best place in the world to receive cutting-edge treatment, a stem cell transplant. But all along, the best medical expertise was right here at HMR!"*

*My sister came all the way from Italy to donate her bone marrow to me. Dr. Denis Claude Roy and his team performed my transplant operation on October 25, 1996. Thanks to them, I celebrated 20 years of remission this year! I owe them my life and I'll be grateful to them forever. Every year on the anniversary of my transplant, I pay them a visit to thank them for the extraordinary care I received from them.*

And donating to the HMR Foundation is yet another way to express my gratitude for Dr. Roy's medical team, while supporting research on this all too poorly understood disease."

---

**Giancarlo Pellegrino**  
Donor

The HMR Foundation wishes to thank Mr. Pellegrino and his family for their generosity and invaluable support since 2002!

At the HMR Foundation every year, the incredible generosity of thousands of donors contributes to improvements in care and teaching and an increase in the quantity and quality of research conducted at Hôpital Maisonneuve-Rosemont. Your donation, big or small, leads to healing. Thank you so much!

## Healing stems from dedication

*"I've been a Foundation volunteer for three years now. I've been contributing by making thank-you calls, preparing mailings and helping to organize recognition events. I feel at home and appreciated here, and that does me a lot of good. Volunteering is my way to thank the hospital and in particular Dr. Richard Gauthier, a pneumologist at HMR, for the outstanding care my son Martin received during his six-month stay there."*

**It's an important way for me to express my appreciation for the life I have."**

---

**Linda De Luca**  
Volunteer

At the HMR Foundation, passionate, committed and dedicated people give selflessly of their time to support improvements in care, research and teaching. We are deeply grateful for their support! To our volunteers, thank you!
